

Clean Process Market

Overview of product portfolio

Clean Process Market.

LEWA – Creating Fluid Solutions.

Driven by our commitment, our trendsetting products and innovative technologies have set benchmarks for diaphragm pumps and metering systems for over 70 years.

We solve complex tasks from a single source. That ranges from custom pump design, basic and system engineering, global project management, and pretesting to commissioning and maintenance on site. With our consistent will always to develop the best solutions for the customer, we offer you a competitive advantage and visible added value.

In addition, we have also been a sales partner for complementary products for many years. As a result, we can always offer our customers the best solution.

Our core competence is in the design and fabrication of pumps and systems, for markets including:

- Fine chemicals
- Biopharmaceuticals
- Pharmaceutical industry
- Cosmetics industry
- Veterinary medicine industry
- Food and beverage industry
- Nutritional supplement industry
- Electronics and industrial cleaning

Why you can rely on LEWA:

- A solution for your special application: from process analysis to global service
- Highest process safety: individual pump configuration and state-of-the-art design
- International engineering and project competencies
- Highest reliability: developed for continuous operation
- Low lifetime costs: reduced energy consumption and low-wear design
- Compliance with international standards, e.g. ASME, DIN, EHEDG, FDA, TR CU, NSF, TÜV
- Comprehensive reference list

LEWA ecoflow hygienic
Diaphragm metering pumps in a flexible modular system for medium to high pressures in the pharmaceutical, cosmetics, and food industries.

LEWA ecodos hygienic
Diaphragm metering pumps for low pressures in the pharmaceutical, cosmetics, and food industries.

LEWA triplex hygienic
Process diaphragm pumps for high pressures and critical, toxic, flammable, thin fluids, non-lubricating fluids, or abrasive suspensions.

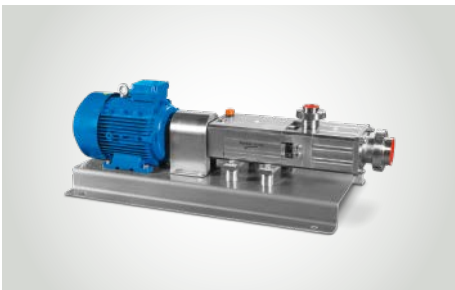

Customized LEWA systems
Tailored solutions for various Clean Markets applications, such as buffer inline dilution systems or dosing systems.

LEWA homogenizer
System equipped with LEWA triplex diaphragm pump and homogenizing valve for aseptic applications.

Pomac*
Rotary lobe pumps for hygienic standard applications up to complex sterile applications with thin fluid, viscous or shear-sensitive media.

Pomac*
Stainless steel double screw pumps are very flexible and self-priming. Suitable for sensitive media from thin to highly viscous with pieces up to 30 mm – as CIP and product pump.

Pomac*
Stainless steel centrifugal pumps for thin fluid media in the hygiene sectors

WILDEN hygienic*
Compressed air pumps for the gentle transport of shear-sensitive products in the hygiene and sterile sectors
